Hamburgh, August 12.

Etters from Coningsberg continue to talk of the breaking off of the Conferences of Aland, and we begin again to believe, that the King of Sweden mediates an Invasion of the Kingdom of Norway, having caus'd some Brigantines and Gallies to be transported over a Neck of Land of the Swines our Country, and make Excursions; but the Viee Admiral Rosenpalm will oppose them, and is already making Preparations to attack and dislodge the Vessels which have crept into that Corner.

The Caar forms divers Pretensions upon Poland, he demands that the District of Mohilow

The Czar forms divers Pretentions upon Poland, he demands that the Diffrict of Mohilow be given him, for Reimburfing his Charges in the War against Sweden; he further demands, a formal Renunciation of Smolensko, Kiow, and other Territories, to be given up to him by the Republick, and that they shall never afterwards claim the least Right to them. The Czar requires also, that the Great Generals, especially him of Poland, shall be entirely restored to their former Rights, Prerogatives, and absolute Power in commanding the Troops, and that all that was regulated by the late Pacification on that Account, shall be abrogated, M. the Field Marshal Count de Fleming, having been declared Chief of 12000 Men, which are put upon the German Foot, in Reclusion of the Power of the Feldherr.

Hamburgh, Aug. 16. Letters from Vienna advice, that Prince Eugene will, soon after his Return to Vienna, go to the Austrian Netherlanda, in order by his Presence intirely to calm the Troubles and Disorders that are arisen there, and that 4000 Men more will be sent thither, but as they pass, they shall join the Troops design'd for the Execution of Rhynfels, in ease it be needful. His Imperial Majesty has named the General Count Virmond to go in Quality of Ambassadour Extraordinary to the Republick of Poland, in Order to propose something of Importance to the Diet that is to be held there, which may probably concern the Succession of the Electoral Prince of Saxony to the Crown of Poland. In the mean time, there are some who apprebend, that inasmuch as so great a Number of Russians are still in Poland, and so near Warsaw, and withal, that the Czar makes such unexpected Demands upon the Republick, the King of Poland will most probably put off the Diet to some other Time, not finding Security enough for his Person in the present Situation of Affairs.

fon in the present Situation of Affairs.

They write from Rostock, that the Baron de Kniphausen is arrived there, on the Part of the King of Pausia, and that his Commission is to perturbe the Duke of Mecklemburg Schweria, to accommodate Matters with his Nobility, and so redress all things so well, that they may not be ablig d to make use of Force. But some are of Opinion, that that Duke sinding himself sustained by so puissant an Ally, having besides, a Body of 10 ar 12000 Mer on Foot, will be obstitute, and wait the Erromy. In the mean time the Directorium, the Circle have written to him, to send away to mediately the Russian Troops, and to submit to the Clemency of his lasperial Majesty. The furd, that the King of Prussia has given Order to a good part of his own Troops to keep these selves in Readiness to March whenever they fail be commanded, and has ordered a Train of Artillery to be got ready. The Advices convening

the Conferences in the Isle of Aland are so variable, that all that is written of them seems to be
meer Conjecture.

Hague, Aug. 16. Prince Kurakin, Ambassadour Extraordinary of his Czarish Majesty, having presented an ample Memorial to the President of the Week, to notify the Death of the
Czarowitz, their High Mightinesses bave caus'd
to be made to him by the said President, a Compliment suitable to the Occasion. And as the
Czar's Court accuse the Minister of this State of
having made a sinister Report concerning the late
Czarowitz, this Ambassadour has taken Pains to
employ all his Rhetorick in this Memorial to
imbellish that Subject. The same Ambassadour
has also presented to the Deputies of the States,
the following Writing, (which is sent to the Deputies for Foreign Affairs to be examin'd.)

the following Writing, (which is sent to the Deputies for Foteign Affairs to be examin'd.)

His Czarish Majesty has order'd his Ambalasia and Extraordinary to communicate to their High Mightinesses the Orders and Instructiona given to Privateers which he has thought fit for his Service to put to Sea, to the End that their Subjects navigating in Parts where they may be met by those Privateers, may be able, by having Knowledge of those Instructions, to regulate themselves accordingly. His Czarish Majesty, at the same, charges his Ambassadour to let their high Mightinesses his Ambassadour to let their forbids his Privateers to take Ships of the Subjects of this State trading in Sweden, it is done in hopes, that according to the Resolution they they have taken, they will constrain the King of Sweden to permit also Freedom of Traffick to the Places of his Czarish Majesty. But if contrary to all reasonable Expectation, this cannot be brought to pass, his Czarish Majesty will be obliged to follow the Example of the King of Sweden, and treat the Subjects of this State in the same Manner he does, that he may not leave to Sweden the Advantage it draws from that Trade, and the Prizes they make, which alone have hitherto surnished the King of Sweden with the Means of carrying on the War as gainst his Czarish Majesty.
